Beijing V.TurfPro™ International Trading Company

Bedknives, Reels, Tines, Verticut Blades, Rollers, Rotary Blades

Welcome to Beijing V.TurfPro™

Company Profile

Quality

Pricing

Service

The company dedicates to providing the best turf and golf products and industry-leading customer service all around the world.

We currently offer bedknives, rotary blades, verticut blades, and other lawn mower accessories, such as aerating tines and lapping compounds. We provide products to landscapers, manufacturers, lawn mower service contractors, golf clubs and importers. We supply Cart Parts for EZGO, Club Car, and Yamaha online with perfect parts solutions at reasonable prices.

In addition, V.TurfPro also has hundreds of turf and golf cart replacement parts and accessories that will change the appearance of your cart or upgrade the stock performance. We provide fast delivery, quality guaranteed, and affordable one-stop-shop for turf and golf parts and accessories.

Welcome to Beijing V.TurfPro™

Our ADVANTAGES

Quality

Pricing

Service

Here at V.TurfPro, we work extremely hard to provide clients with the highest quality products.

- Each product is CE certified.
- We have a sophisticated ISO9001 system to manage and control the quality, and help us to enhance production capabilities and ensure quality output.
- We utilize CNC machining centers and automatic manipulators to ensure machining precision and speed. High-powered laser cutting machines are used for the extremely important size cutting process. Automatic welding machines ensure high welding speed and quality.
- Our team is loaded with talents, professional engineers with more than 20 years of experience in manufacturing. They can provide you with high-quality customization services even if you cannot provide drawings or samples.

Maintaining strong cooperative relationships with raw material suppliers allows us to produce superior products.

VTP Lapping Compound

V.TurfPro Lapping compounds are primarily used for lawn mower blade lapping. As dull blades lead to tearing and squeezing of lawn clippings, lawn mower efficiency is decreased with an increase in energy consumption. Because of this, lapping compounds are used to ensure lawnmower blades remain sharp and in superior condition.

VTP Reels

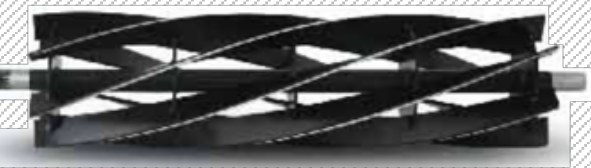

V.TurfPro produces a wide range of reels that are compatible with the various models of mowers. Made from high carbon steel that has been heat-treated, these reels feature a hardness up to RC 50 - 54 (Green) and RC 53 - 56 (Fairway). Delivering outstanding toughness and long-term performance, these parts are superior to the competition.

VTP Tines

Quality

Pricing

Service

V.TurfPro's tines are compatible with a variety of lawn aerator machines. Tines are produced by experienced engineers who are experts in understanding the requirements of lawn maintenance equipment performance.

With an excellent working effect and smooth inner and outer tine edges, the required mowing rate for lawn maintenance is easily met.

During lawn maintenance and punching processes, sand in the holes is unable to be completely removed, which often leads to local deformation of the lawn and bottom layer knots. V.TurfPro's tines minimize the punching and actuality on the lawn, so that the sand volume removed is reduced, thus reducing customer operating costs.

VTP Verti-Cut Blades

Quality

Pricing

Service

With exceptional precision, durability, and quality, our verti-cut blades are an exceptional replacement blade option. V.TurfPro's blade is made with the highest quality hand-picked steel and laser cut to our exact specifications for exceptional durability and wear resistance. With tungsten carbide tips, these blades are abrasion-resistant and feature a long service life with a consistent cutting depth. The cutting width is optional, based on local turf conditions.

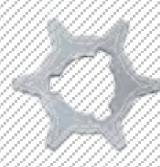

Our OEM verti-cut heads are ideal replacement equipment for use in internationally known lawn equipment names, including Toro, John Deere, Jacobsen, Ryan, Garden, SISIS, Hahn, Brouwer, LandPride, and many more. Convert your old mower into a dedicated verti-cut mower today! Feel free to browse the blade chart, and find the right blade for your equipment under specifications.

VTP Rotary Blades

V.TurfPro offers rotary cutter blades for original equipment manufacturers and aftermarket distributors, all in a variety of specifications. Rotary mowers cut grass using a blade cutting surface that impacts against grass stem at a high velocity. To ensure an excellent cutting performance, the blade must be kept sharp, as the most common causes for a poor-quality cut are dull cutting edges and/or bent blades. High-quality steel allows for multiple sharpening processes, which is why our rotary mower blades are made of a high carbon alloy steel paired with a hardening process to ensure each blade meets and even exceeds OEM standards.

Our blades are exceptional aftermarket OEM replacement parts for a number of international brands name lawn equipment providers, including John Deere, Jacobsen, Toro, Baroness, Honda, Masport, MTD, Allen, Yardman, Stiga, Husqvarna, Weibang, World, and many more. Feel free to browse the blade chart and find the right blade for your needs under the specifications.
